POND.

AN

ALMANACK

for the year of our

LORD GOD

1664.

Being Bisſextile or Leap-year, and from the Worlds creation according to the beſt account 5667.

Amplified, with many good things, both for pleaſure and profit: and fitted for the meridian of *Saffron-Walden* in *Eſſex*, where the Pole is elevated 52 degrees and 12 minutes above the Horizon.

Whereunto are added the ſeveral Fairs held in *England* each moneth this year.

Omnia cum virescunt, tunc eſt nova tempora dicis:
Sic Annus per Ver incipiendus erit.

CAMBRIDGE:
Printed by *John Field*, Printer to the *Univerſitie*. 1664.

Of the Suns entrance into the four cardinal Signes.

THe Sun enters *Aries* this year on the 9 day of *March*, at six of the clock in the afternoon.

He enters *Cancer* on the tenth day of *June*, at nine of the clock at night.

He enters *Libra* on the twelfth day of *September*, six minutes past noon.

He enters *Capricorn* on the tenth day of *December*, 47 minutes past eleven at night.

Times prohibiting marriage this year.

MArriage comes in on the 13 of January, and by the seventh of February it is out again untill Low-sunday, at which time it comes in again, and goes no more out till Rogation-sunday: From whence it is forbidden again till Trinity-sunday, from thence it is unforbidden till Advent-sunday. But then it goes out and comes not in again untill the 13 day of January next after.

And note, that the Golden Number this year is 11
The Cycle of the Sun 2
The Epact 11
The Dominical letters are C B
Easter day, April 10

The Anatomy of Mans bodie, as the parts there of are governed by the twelve Signes.

Brief rules of Husbandry.

PLant and graff the Moon increasing in Taurus or Aquarius, the wind not Easternly.
ll timber from Midsummer till Christmas, the Moon increasing.
ll coppice and fewel, the Moon in the first quarter.
ut your Vines in February or March.
ld cattell the Moon in Aries, Sagittarius, or Capricorn.
emove trees, the Moon at the last quarter in Novemb.
hear sheep, and cut hair to grow, the Moon increasing.

To keep thy hair safely from falling untimely,
Hot scalding baths deny, hate wanton company,
Abstain from Venery, purge choler [illegible],
Let thee bloud needfully, surfet not [illegible].

January hath xxxi days.

Full moon the 3 day. 37 minutes past 3 in the morning.
Last quarter the 10 day, 9 minutes past 3 in the morning.
New moon the 18 day, 41 min. past 7 in the morning.
Last quarter the 25 day, 46 minutes past ten at night.

MDCLXIV.

The latter part of this ALMANACK for the year of our LORD GOD 1664.

Being Biſſextile or Leap-year, and from the Conqueſt of *William* Duke of *Normandy* 598 years.

Frigidus & ſiccus Satur. Jup. *æſtuat udus.*
Mars & Sol *ſicci fervent: ſed* Luna Venúsque
Udæ frigeſcunt: medius Cylenius *eſto.*

Inter ſpem curámque, timores inter, & iras,
Omnem crede diem tibi diluxiſſe ſupremum.

CAMBRIDGE:
Printed by *John Field*, Printer to the *Univerſity*. 1664.

Of the Eclipſes this year.

THere will be four Eclipſes this preſent year, two of the Sun, and two of the Moon; but we in England ſhall onely ſee the laſt of them, which is a very great total Eclipſe of the Moon. It will be upon Wedneſday the 27 day of July, beginning at 24 minutes paſt nine a clock at night. The middle of it is at 24 minutes paſt eleven. But at 37 minutes paſt ten it beginneth to be totally darkned, and continues ſo untill 12 minutes paſt twelve, the Moon beginning then to recover ſome of her light, but is not fully recovered until 25 minutes paſt one. From whence is gathered, that the whole time of the Eclipſe (from firſt to laſt) is fully four hours and one minute: of which there will be one hour and 35 minutes ſpent in total darkneſs, before the recovery of any light. This therefore is a great Eclipſe, and is to the quantitie of four digits and 22 minutes more then the body of the Moon extendeth to.

Of the four quarters of the year.

The *Vernal* quarter derives his name *à virendo*, from flourishing; *quia tunc omnia virent & florent*, because all things then flourish: this being the first quarter in the year, as appeareth by the old distich.

Omnia cùm virent, tunc est nova tempora status
Sic annus per Ver incipiendus erit.

This quarter beginneth *March* the 10, the Sun then entring into the first degree of *Aries*, producing the first *Equinox*; and continueth till *June* the 10: in which time the Sun runneth through *Aries*, *Taurus*, & *Gemini*. It is a Quarter naturally (though accidentally it sometimes prove otherwise) hot and moist, resembled to the Meridian-region of the World, the South-wind, the Air, the Sanguine complexion, and to infancy. The ordinary diseases (according to the common course) of this quarter be Leprosies, Red-spots, Fevers of blood, small pox, with other infirmities proceeding of blood.

The *Æstival* quarter is next. It beginneth *June* the 11, the Sun then entring into the first degree of *Cancer*: and continueth till *September* the 12: during which time the Sun runneth through these three celestial constellations, viz. *Cancer*, *Leo* and *Virgo*. It deriveth the name *ab æstu*, from the exceeding heat which useth to be now, as also the English word Summer doth: for it is called Summer, *quasi* sunne mehr, as the *Germains* speak; that is, *plus soleis*, because we have more of the sun then, then at any other time.

This quarter is naturally hot and dry, resembled to the Oriental region of the World, to the East, to Choler, to Youth. The sickenesse agreeing hereunto be Sto-

Stomach-aking, Apostumes, Pestilent Feavers, Jaundise, with other infirmities proceeding of choler. According to the *Arabians* this is the first quarter of the year, who hold that the Sun was made in *Leo*: and their reason is, because the *Lion* is the house of the Sun. *Mercator* in his Chronologie is of the same minde, but backs his opinion very weakly.

The *Autumnal* quarter beginneth *September* the 13, the Sun entring into the first degree of *Libra*, producing the second *Equinox*; and continueth till the 11 of *December*: in which time the Sun runneth through *Libra*, *Scorpio*, and *Sagittarius*.

This quarter the *Jews* own for the first quarter of the year: and their reason is, *quia tempus est fructuosum*, because it is a time of fruit; according to that in the Scripture, *Et protulit terra herbam vitentem facientem fructum juxta genus suum*, And the earth brought forth the green herb yielding fruit according to its kind. It is a quarter naturally cold and dry, resembled to the Septentrional-region of the world, to the North wind, to the Earth, to Melancholy, and to the declining age of man. The diseases properly incident to it be pains in the back, darkness of sight, retention of urine, also the canker, fistoloes, emrods, with other infirmities proceeding of melancholy.

The *Hyemal* or winter quarter (being naturally cold & moist, resembled to the Occidental-region of the world, to the west, to water, to flegm, and to old age) beginneth *December* the 10, the Sun then entring into the first degree of *Capricorn*; and continueth till *March* the 10: in which time the Sun runneth through these three celestial signs, viz. *Capricorn*, *Aquarius*, and *Pisces*.

This quarter, though of us accounted the last, yet by *Numa Pompilius* it was accounted the first, and that

for

[illegible] this reason; *quia [illegible] Sol ad nos ascendere incipit*; be-[illegible]se the Sun then begins to ascend the Ecliptick; whence [illegible] Poet, *Ovid* by name,

Bruma novi prima est veterisque novissima solis.
Principium capiunt Phœbus & Annus idem.

The diseases incident to this quarter be commonly [illegible]hes in the face, tooth-ach, scabs, fluxes of blood by [illegible] inferiour parts, palsies, gouts, with other diseases [illegible]ceeding of flegme.

A medicine for the Gout.

The roots of Comfry taken fresh, beaten small, [illegible]nd spread upon leather, and laid upon any place [illegible]oubled with the Gout, doth presently give ease of [illegible]e pains, as by often experience hath been found. [illegible] is good also for pains in the joynts, Gangrens, and [illegible] very profitable for running and moist ulcers.

A medicine for a Boyl.

The herb Balm is an herb of *Jupiter*, and under *Cancer*. This herb, if it be bruised and boyled in a [illegible]ttle wine and oyl, and laid warm on a Boyl, it will [illegible]pen and break it.

A medicine to cure Numbness, &c.

Take an oyl made of the Berries of the Bay-tree, [illegible]nd therewith anoint the place, for it is very com-[illegible]ortable in all cold griefs of the joynts, Nerves, Ar-[illegible]ries, Stomach, Belly or Womb; and helpeth Pal-[illegible]s, Cramps, Convulsions, Aches, Trembling and [illegible]umbness in any part; weariness also and pains that [illegible]ome by sore travelling.

A medicine for womens breasts.

Bean flower made into a Pultiss is good to asswage Inflamations rising upon wounds, and to help the swellings of womens breasts caused by the curdling of their Milk, repressing their Milk; &c.

Against Chilblains or Kibes.

Take the common white Beet, & boyl the leaves thereof in water: then take and lay them upon Kibes or Chilblains, and it will help them.

Against the Tooth-ach.

The decoction of Wood Betony made in Wine, and gargled in the mouth, easeth the Tooth-ach. This herb is appropriated to the Planet *Jupiter*, and the sign *Aries*. A decoction of Hysop in vinegar will do the like: it must be sodden to halfs.

Good against the Itch.

The leaves of the Bramble or Black-berry-bush boyled in Lie, and the Head washed therewith, healeth the Itch and the running sores thereof, but will die the Hair into a black, or at the least make it blacker then it was before.

Good against Deafness.

The juice of either the Winter or Summer-savory heated with a little of Roses, and dropped into the ears, easeth them of the Noise and Singing in them, and of Deafness also.

Good

Good against Worms:

The seed of Purslane bruised and boyled in wine, and given to children, expelleth the Worms.

Good for the Liver and Spleen.

The decoction either of the Leaves or Bark of the Maple-tree, is very good to strengthen the Liver: and is also good to open obstructions both of the Liver and Spleen, and easeth pains of the sides proceeding from thence.

For a sore Mouth or Throat.

The flowers of Mallows boyled in oyl or water, whereunto a little Honey and Allum is put, is an excellent Gargle to wash, cleanse, and heal any sore Mouth, or Throat, in a short space.

For a broken-winded Horse.

The herb Lungwort boyled in Beer is an excellent remedy for broken-winded Horses: which you may give them as you give any other Drink.

For a Pin and web in the Eye.

The fine powder of Liquoris blown through a Quil into the eyes that have a Pin and Web (as they call it) or Rewmatick Distillations into them, doth cleanse and help them.

For the Ague.

The Decoction of the leaves and seeds of Saint Johns-wort being drunk somewhat warm be-

the fits of Agues, whether they be Tertians or Quartans, doth alter the fits, and by often using doth take them quite away.

The vertues of Clove-Gilli-flowers as they be set down by Mr Culpeper *in his* Englifh Phyfician.

THey are gallant fine temperate flowers, of the nature and under the dominion of *Jupiter*; yet, fo temperate, that no exceſs, neither in heat, cold, drineſs, nor moiſture can be perceived in them. They are great ſtrengtheners both of the Brain & Heart, and will therefore ſerve either for Cordials or Cephalicks as your occaſion is. There is both a Syrup and a Conſerve made of them: to take now & then a little of either, ſtrengthens nature much, to ſuch as are in Conſumptions. They are alſo good in hot Peſtilential Fevers, and expell poyſon.

Sed contra vim mortis non eſt medicamen in horto.
Statutum enim eſt omnibus ſemel mori, Heb. 9. 27.

Other Phyſical Obſervations.

LEt bloud at no time without great cauſe; for it bringeth weakneſs and many infirmities. If ye do, ſee it be after good digeſtion and faſting, in a fair temperate day, if it may be. Beware before of all manner of exerciſes, as bathing, watching, carnal copulation, &c. After, uſe fine meats of light digeſtion, abſtaining from all aforeſaid until the 4 day.

Then

These Signes are ill for bloud-letting, the Moon being in them, viz. *Taurus*, *Gemini*, *Leo*, *Virgo*, and *Capricorn*, with the last half of *Libra* and *Scorpio*: the rest are all good, if the Moon bear no dominion in that member which ye cut.

Furthermore, in letting of bloud you must know what persons are fit to bleed, and what not: and if they be fit, how it is with the patient inwardly, for his complexion and age; outwardly, for the time of the year, time of the moneth, day, and diet.

For Complexion.

For the Flegmatick, let the Moon be in *Aries* or *Sagittarius*: for the Melancholy, in *Libra* or *Aquarius*: for the Cholerick, in *Cancer* or *Pisces*: and for the Sanguine, in any of the aforesaid, *Luna signum membro dominans peragrante*.

For age let bloud.

In youth, from the change to the first quarter.
In middle age, from the first quarter to the full.
In elder age, from the full to the last quarter.
In old age, from the last quarter to the change.

For the time of the year.

The *Spring* is best, *Autumn* indifferent, the rest of the year bad, and to be used but upon necessitie.

In Spring *and* Summer *let the right arm bleed.*
The Fall *and* Winter *for the left more good.*

For the time of the moneth.

Let not bloud three days before nor three days after the change: nor the day before, nor the day after the conjunction of *Luna* and *Saturn*, or of *Luna* and *Mars*; nor when *Venus* and *Luna* be in conjunction, if *Venus* at the same time be combust. The best and fittest time is, when the *Moon* is aspected with *Jupiter* or *Venus* incombust; or in Sextile or Trine with *Sol* or *Mars*.

The time of the day.

The morning after Sun-rising fasting is the best or in the after noon towards evening after perfect digestion, if the air be temperate, and the wind not south.

Diet after bleeding.

Sleep not presently, Stir not violently,
Feed but warily, Use no Venerie
Soon after Phlebotomie.

But notwithstanding these rules let it be further observed, that for the *Pestilence*, the *Phrensie*, the *Pleurisie*, the *Squinacy*, the *Apoplexy*, a continual *Headach* growing of choler or bloud, a hot burning fever, or any other extreme pain, we are not to tarry for a chosen time, but must presently with all convenient speed seek a remedie: but then bloud is not to be let out in so great a quantity as if a chosen time were had.

And

And as for purging, take these rules.

The ☽ in ♉ in ✶ or △ with	☿	Purge choler	☿ not combust
	☉	Purge phlegme	with Electuaries.
	♃	Purge melancholy	
The ☽ in ♊ in ✶ or △ with	☿	Purge choler	☿ not combust
	☉	Purge phlegme	with Potions.
	♃	Purge melancholy	
The ☽ in ♈ in ✶ or △ with	☿	Purge choler	☿ not combust
	☉	Purge phlegme	with Pills.
	♃	Purge melancholy	
The ☽ in ♌ or ♒ in ✶ or △ with	☿	Purge choler	☿ not combust
	☉	Purge phlegme	with any kinde of medicine
	♃	Purge melancholy	

But see that the Moon be not in any of the signes that chew the cud; as *Aries*, *Taurus*, *Capricorn*: for then the medicine will stay but little with the Patient, causing him to vomit; unless you intend to purge by vomiting, for then indeed these signes are good. Also, in purging melancholy, let not *Saturn* have the dominion; nor *Jupiter*, when you purge the sanguine; nor *Mars*, when you purge the choleric.

Good to be done by the Moon in

Prepare humours	*Gemini*, *Libra*, or *Aquarius*.
Vomit	*Aries*, *Taurus*, or *Capricorn*.
Purge by neezing	*Cancer*, *Leo*, or *Virgo*.
Take clysters	*Aries*, *Libra*, or *Scorpio*.
Take gargarismes	*Cancer*, or *Aries*.
Stop rheums and flux	*Taurus*, *Virgo*, or *Capricorn*.
Bath for cold diseases	*Aries*, *Leo*, or *Sagittarius*.
Bath for hot diseases	*Cancer*, *Scorpio*, or *Pisces*.

Medicina à Medico, medela ab Altissimo.

A plain and easie Table shewing the true interest due upon any summe of money, from five shillings to an hundred pounds for a year or under, after the rate of six pounds in the hundred.

A true computation of some things memorable.

Since the *World* began	5668
Since *Noahs* Floud	4011
Since the birth of *Abraham*	3659
Since the birth of *Isaac*	3559
Since the birth of *Jacob*	3500
Since the birth of *Joseph*	3408
Since *Joseph* was sold by his Brethren	3390
Since *Jacob* went down into *Egypt*	3368
Since *Moses* was born	3234
Since the giving the Law upon *Mount Sinai*	3154
Since *Moses* died	3114
Since *David* began to reign	2718
Since *Solomon* began to build the Temple	2675
Since *Nebuchadnezzar* burnt it	2231
Since *Zorobabel* began again to build it	2183
Since the building of the Tower in *London*	2081
Since *Alexander* the Great died	1987
Since the building of *Cambridge*	1964
Since *Julius Cesar* conquered *Britain*	1717
Since the destruction of *Jerusalem* by *Titus*	1594
Since *S. John* wrote his *Revelation*	1569
Since *Lucius* the first Christian K. began	1483
Since *Constantine* (the first Christian Emperour) began	1340
Since *Cambridge* was made an *University*	1029
Since the first Major of *London*	474
Since the invention of *Guns*	284
Since the invention of *Printing*	224
Since *Tilbury Camp*, *July* the 25	76

How the moveable feasts are found readily.

CHeck the change of the moon in *February* for that year ye desire the moveable feasts. Then note what day it falleth on, the next Tuesday is Shrovetuesday; but if the change be on Tuesday the next Tuesday ensuing is it. The next Sunday is the first Sunday in Lent. Six Sundays after is Easter-day. Add 35 days or 5 weeks to Easter-day, and ye have Rogation-sunday. To that add 4 days, so ye have Ascension day: then have ye 10 days to Whitsunday. And 7 days after is Trinity-sunday.

Of the week.

A Week hath divers names. In *Latine* it is called *Septimana, à septem & mane*, as it were having *septem matutina tempora*, seven mornings. It is also called *Hebdomas, ab* which is *septem*, as containing seven days. It is also called *Sabbatum* by the *Jews*, as appeareth by that sentence in Scripture: *Jejunio bis sabbato, &c.* where the word *Sabbatum* is *equivocum ad totam septimanam*. You may observe the *Jews* Sabbath day was Saturday: but the *Christians* observe Sunday, which they call *dies Dominica*, The Lords day; because on that day *Christ Jesus*, our Lord and Saviour, arose from the dead.

How to finde the age of the Moon.

ADd to the Epact the number of moneths from the beginning of *March*, together with the moneth wherein you seek, and also the number of days past of that moneth wherein you seek, and such addition will shew you the age of the moon, if the sum of addition be less then 30; but if it exceed 30, then substract 30, and the remainder shall be the age of the moon, if so be the moneth wherein you seek hath 31 days: but if it hath less then 31, substract but 29, and the remainder shall be the age.

A rule to finde the Moons distance from the Sun, by which is gathered at all times the Signe and degree where the Moon is.

Multiply the age of the Moon by 4, divide by 10, the quotient sheweth the signes that the Moon differeth from the Sun; the remainder augmented by 3, bringeth degrees to be added: Ye must put these signes and degrees to the place of the Sun. The product, I mean the encrease or end of all these signes and degrees, in order counted from the Sun, declares the place of the Moon in the Zodiack.

The Characters of the 12 Signes, 7 Planets, Dragons head and Tayl.

♈ *Aries.* ♉ *Taurus.* ♊ *Gemini.* ♋ *Cancer.* ♌ *Leo.* ♍ *Virgo.* ♎ *Libra.* ♏ *Scorpio.* ♐ *Sagittarius.* ♑ *Capricornus.* ♒ *Aquarius.* ♓ *Pisces.* ♄ *Saturn.* ♃ *Jupiter.* ♂ *Mars.* ☉ *Sol.* ♀ *Venus.* ☿ *Mercurie.* ☾ *Luna.* ☊ *The Dragon-head.* ☋ *The Tayl.*

The Aspects both old and new.

☌ *A conjunction*, when Planets are in one signe and degree.
SS. *A semisextile*, when Planets are distant one signe.
⚹ *A sextile*, when any are distant 2 signes.
⚺ *A quintile*, when distant 2 signes and 12 degrees.
□ *A quartile*, when they are 3 signes distant.
Td. *A tredicile*, when they be distant 3 signes & 18 degrees.
△ *A trine*, when distant 4 signes.
Bq. *A biquintile*, when distant 4 signes and 24 degrees.
Vc. *A quicunx*, when they are asunder 5 signes.
☍ *An opposition*, when the distance is just 6 signes.

Of many and sundry Fairs in *England*, as they have heretofore been set forth by others, and are now continued for the common good.

January.

THe 5 day at Hicketford in Lancashire: the 6 day at Salisbury: the Thursday after at Banbury: the 25 at Gravesend, Bristol, Churchingford, Northallerton in Yorksh. every Wednesday from Christmas untill June.

February.

The first day at Bromly in Lancashire: the 2 day at Reading in Barksh. Maidstone, Bicklesworth, Beckles-field, Bath, Lin, Bugworth: the 3 day at Bregrove: on Valentines day at Owndle in Northamptonshire, Fe-versham: the 24 day at Henly upon Thames, Baldock, on Ashwednesday at Royston, Dunstable, Eaton, Tam-worth, Tunbridge, Lichfield, Exceter, Ciceter: the first Thursday in Lent at Banbury.

March.

The 3 day at Bromwel-braks in Norfolk: the 4 at Bedford: the 12 at Alsome in Norfolk, Sudbury, Woo-burn: the 13 at Wye, Bodwin in Cornwall: the 20 at Durham: the Monday before our Lady-day at Kendal, Wisbich: the 25 day at Huntington, Northampton, Malden, Ashwel in Hartfordshire, Newcastle: Midleng at Saffron-Walden in Essex: Goodfriday at Norwich: Palmsunday-eve at Wisbich, Worcester, Pomfret.

April.

Easter-monday at Oney in Bedfordsh. Gainsborough: Easter-tuesday at Daintry in Northamptonsh. Godm-on-chester,

cheſter, Schole in Norfolk, S. Edmonds-bury: on Wedneſday at Wellingborough in Northamptonſh. on Friday in the ſame week at Darby: on Saturday at Bickleſworth: the 2 at Hitchen, Rochford, Northfleet: the 7 at Darby: the 9 at Billingſworth, Bickleſworth: the 21 at Stabford: the 23 at Ipſwich, Harbin in Norfolk, Northampton, Sapſar in Hartfordſh. Charing, Hinningham, Tamworth, Bury in Lancaſhire, S. Pombs in Cornwall: the 27 at Dunmow in Eſſex, Oakham in Rutlandſhire, Buckingham, Darby: the 29 at Tenderden in Kent, Cleet: the 30 at Beverly a week together.

May.

The firſt day at Haveril in Eſſex, Layton-buzzard in Huntingtonſh. Rippon in Yorkſh. Reading, Maidſtone, Turford in the clay: the 3 at Elſtow in Bedfordſh. Nonneaton in Warwickſh. Thedford in Norfolk, Chelmsford in Eſſex, Waltham-Abby, Hinningham, Rochdale, Bramyard: the 7 at Newton in Lancaſhire, Beverly, Otford: the 10 at Rocheſter, Dunſtable, Magfield in Suffolk: on Rogation-monday at Reach: on Aſcenſion-day at Thaxted, Beverly, Rippon, Sudminſter, Biſhopſtratford, S. Eedes, Wickam in Lancaſhire, Middlewich in Cheſh. Chappel-frith in Darbyſhire: on Whitſun even at Skipton in Craven: on Whitſun-monday at S. Ives, Rygate in Surrey, Bickleſworth, Bradford, Agmunſham in Buckinghamſh: on Whitſun-tueſday at Newmarket: on Wedneſday at Royſton: on Thurſday at Owndle in Northamptonſhire: the 26 day at Lenham: the 29 at Crainbrook.

June.

On Trinity-eve at Rowel, Kendal: on Corpus Chriſti at Banbury, Biſhops-ſtratford, S. Eedes, Coventry, Newbury: the 9 at Maidſtone: the 11 at Breme in Norfolk, Bardfield in Eſſex: the 17 at Hadstock: the 23 at

S. Albans,

S. Albans, Deerham in Norfolk, Shrewsbury: the 24 at Halfon in Suffolk, Barnwel beſide Cambridge, Bedford, Colcheſter, Rumford, Reading Windſor, Halifax, Hartford, Beverly, Haſlingden; the 26 at Briſtol, Darby: the 27 at Burton on Trent, Folſtone: the 28 at S. Pombs in Cornwal: the 29 at Peterborough, Aſhwell, Sudbury, Tebbing in Eſſex, Benington in Hartfordſhire.

July.

The 1, 2, and 3 days at Congleſtone in Cheſh. the 7 at Royſton, Burntwood: the Monday after at Fodringham: the 11 at Partney for horſes: the 20 at Uxbridge, Coolidge, Woodſtock, Barkway: the 22 at Ickleton, Bickleſworth, Norwich, Colcheſter: the 25 at Audley end beſide Walden, Reading.

Auguſt.

The firſt day at Bedford, S. Eedes, Dunſtable, Feverham, Wisbich, Bickleſworth, Stoniſtratford: the 10 at Blackamore, Harply in Norfolk, Thaxted in Eſſex, St. Ives, Bedford, Banbury, Farnham, Brainford: the 15 at Cambridge, Huntington, Dunmow, Linton, Northampton: the 24 at London, Sudbury, Norwich, Oxford, Northalerton, Dover, Beggers buſh, Burton: the 29 at Halſon in Suffolk, Harlow buſh in Eſſex, Watford.

September.

The firſt day at S. Giles in the buſh: on Thurſday & Friday next before the 8 day at Sandbach in Cheſh. the 7, 8, 9 and 10 days at Woodbury-hill in Dorſetſh. the 7 at Ware: the 8 at Huntington, Bury in Lancaſh. Partney, Wakefield, Northampton, and Sturbridge fair belonging to Cambridge begins: the 14 at Rippon for horſes, Waltham-Abbey, Cheſterfield in Darbiſh. Richmond: the 21 day at Marleborough, Bedford, Baldoc, S. Edmondsbury, Holden in Holderneſs, Braintry, Bracklymaiden

Jymaiden, Malden: the 5 at S. Ives, Baſingſtoke, M
ket-deeping, Shelford in Bedfordſhire, Biſhopsſtra
